manufacture and ship its products regionally, versus shipping products from its Midwest U.S. operation, thus creating a more efficient and sustainable business model.

Fonterra: Organic Dairy Demand Up in Asia

Dairy exporter Fonterra (Auckland, New Zealand) talked about its growing organic business in Asia, for products like cheese and infant formula, at the recent organic-focused BioFach tradeshow in Nürnberg, Germany.

“Food safety seems to be one of the predominant reasons behind the growth in the Asian markets,” stated Craig Deadman, Fonterra’s global marketing manager of organics, in a press release. “Asian and particularly Chinese consumers have a high level of confidence in [the] safety and naturalness of New Zealand’s organic dairy products.”

American Labs Upgrades Quality-Control Systems

Enzymes specialist American Laboratories Inc. (Omaha, NE) has hired software solutions provider MasterControl (Salt Lake City, UT) to upgrade its quality-management system. Upgrades will be made in all three American Laboratories facilities to enhance quality-management systems and take into account current and future GMPs, Good Laboratory Practices, and Good Documentation Practices by automating and managing document and change control, training management, performing corrective and preventative actions, and more.

NSF Now Offers GreenScreen Testing

NSF International (Ann Arbor, MI) announced it can now offer hazardous-chemicals screening performed in accordance with the GreenScreen testing method developed by Clean Production Action, an organization focused on developing solutions for products that are eco-friendlier.

NSF offers the GreenScreen testing as part of its Sustainability Division’s services. NSF’s toxicologists, chemists, and biologists perform the comparative chemical hazard assessments by reviewing product ingredients

and formulations according to GreenScreen standards. Chemicals are then given one of four benchmark scores to indicate high or low hazard levels.

NSF Sustainability offers testing for other chemical hazard-assessment programs as well, including the U.S. Environmental Protection Agency’s Design for the Environment and GreenBlue’s CleanGredients.

MegaNatural-BP Gets Fourth U.S. Patent

Constellation Brands’ Polyphenolics division (Madera, CA) received a fourth U.S. patent in December for its MegaNatural-BP grape seed extract, which targets blood pressure and cardiovascular health. The patent (No. 8,075,929) covers the process by which the ingredient is produced.

MegaNatural-BP’s other patents address the ingredient’s lower molecular weight that makes the ingredient more easily absorbed by the body and able to reach the endothelium; its ability to lower blood pressure in pre-hypertensive subjects and/or those with metabolic syndrome; and its unique water extraction, purification, and enrichment of polyphenolic substances from whole grapes, grape seeds, and grape pomace.

Corn Products: Name Change to Ingredient

Corn Products International (Westchester, IL) has announced it will change its name to Ingredient, pending shareholder approval at its annual meeting in May. The company says that the name change will signify its role as a global ingredients supplier to a range of industries, including packaged food, beverage, and brewing.

“The first part of the name represents ‘ingredients,’ while the second part has its roots in the Greek word that means ‘something that goes.’ It says clearly that we’re an ingredient solutions company,” said Ilene Gordon, chairman, president, and CEO.

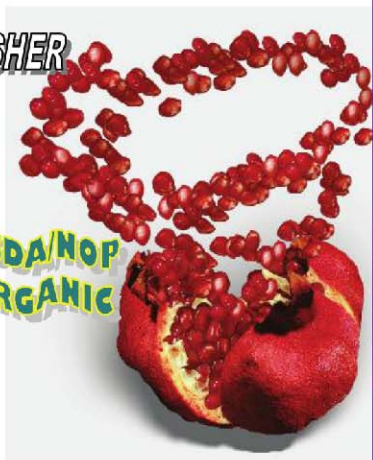

Fruitflow Ingredient Exploring Powder Form

UK firm Provexis says that focus is now fixed on developing a powder version of Fruitflow,

Company Descriptions PHA-PRI

Pharma Base NA

Pharma Base manufactures and distributes ingredients manufactured in GMP facilities to meet high-quality dietary supplement standards.
www.pharmabase.com

Pharmaceutical Consulting Services LLC

Pharmaceutical Consulting Services LLC offers various GMP-compliance programs designed to increase production efficiency while integrating GMP regulations in a well-constructed operating program. The programs can provide procedures, forms, and templates, as well as training and training materials.
www.comply2000.com

Pharmachem Laboratories Inc.

Pharmachem Laboratories Inc. develops, manufactures, and supplies a variety of high-quality certified nutritional ingredients, including vitamins, bioflavonoid complexes, trace mineral triturations, mineral chelates, tablet formulations, probiotic complexes, and botanical extracts and powders.
www.pharmachemlabs.com
See ad on page 64, 65

Pharmanutrients Botanical Corp.

Pharmanutrients Botanical Corp. specializes in standardized phytonutrients, nutraceuticals, vitamins, pharmaceuticals, and more. Services include custom formulating, manufacturing, packaging, and marketing. The company is also a certified organic and kosher distributor.
www.pharmanutrients.ca

Pharmline Inc.

Pharmline Inc. specializes in custom formulations; large-capacity blending of liquids, powders, and granu-

lations; and premixes. The company is ISO 9001 and GMP certified.
www.pharmlineinc.com

Pharmore Ingredients Inc.

Pharmore Ingredients Inc. distributes and produces nutraceutical ingredients. The company's products include joint-care ingredients, B vitamins, and sports nutrition ingredients. The company was the first to earn NSF ingredient certification for glucosamine HCl and chondroitin sulfate.
www.pharmoreingredients.com

Phyto-Sourcing

Phyto-Sourcing is a manufacturer representative and consultancy company serving the food and dietary supplement industries. The company also offers marketing and product development services.
www.phytosourcing.com

Pines International Inc.

For more than 33 years, Pines International Inc. has specialized in growing and processing wheat grass, barley grass, alfalfa, and other green food concentrates. Organic farming methods and careful attention to detail result in premium cereal grass products.
www.wheatgrass.com

Piveg Inc.

Piveg Inc. is a global manufacturer of high-specification ingredients for the nutraceutical, agricultural, food and beverage, feed, and cosmetic industries. Since its inception, the company has specialized in the production, extraction, purification, and manufacture of naturally occurring carotenoids in marigold flowers and chili peppers.
www.piveg.com

PlusPharma Inc.

PlusPharma Inc. distributes menthol and products such as peppermint oil, hard-shell capsules, botanical extracts, desiccants, and magnesium and calcium stearate.
www.pluspharm.com

Pocantico Resources Inc.

Pocantico Resources Inc. is a premium supplier of functional ingredients and nutritional supplements, specializing in freeze-dried fruit, fruit granulates, LM and HM pectin, inulin and FOS, gums, honey powder, pea protein, glycene, natural colors, and sweeteners. The company offers warehousing across North America and a team of applications experts.
www.pocanticoresources.net

Polyphenolics

Polyphenolics manufactures and markets a full line of clinically proven grape extracts. The company's key products are MegaNatural-BP grape seed extract, MegaNatural Gold grape seed extract, MegaNatural GSKE grape pomace extract, and Rubired grape juice extract.
www.polyphenolics.com

POM Wonderful LLC

POM Wonderful is a global brand committed to innovation and wellness. The company grows and markets pomegranates and pomegranate-based products offering essential health benefits and says it is the only company that grows, harvests, processes, and ships its own pomegranates.
www.pomwonderful.com

Poms & Associates Insurance Brokers

Poms & Associates Insurance Brokers provides commercial insurance for the dietary supplement industry. The company focuses on reducing the cost of product liability insurance but also provides workers' compensation, auto, property, and umbrella insurance. The company's dietary supplement practice is managed by Greg Doherty, a CPCU, ARM, and CANI member.
